School of Integrated Science and Humanity (SISH)

Executive Director
Suzanna M. Rose

Associate Director
Walter Van Hamme

Research Associate
Melinda Hoder

The School of Integrated Science and Humanity, launched in the Spring of 2011, is a unique integration of academic departments, center and institutes.

The School promotes awareness and discussion of social and ethical issues in human health, develops knowledge in the basic, behavioral and cognitive sciences, and provides leadership in creating partnerships that will expand local economic opportunities. SISH’s multidisciplinary approach extends to local, national and international communities. See also http://sish.fiu.edu.

In the areas addressing human health, the School is a catalyst for strengthening, promoting and contributing to innovative research and teaching, and offers academic programs at the bachelor’s, master’s and doctoral levels in Chemistry and Biochemistry, Mathematics and Statistics, Philosophy, Physics, and Psychology; and a master’s in Liberal Studies. SISH is also home to many of the university’s most prominent centers and institutes focusing on health-related issues, including the Center for Children and Families, the Cognitive Neurosciences Initiative, the International Forensic Research Institute, the Biomolecular Sciences Institute, STEM Transformation Institute, and the Women’s and Gender Studies Center.

The School is housed in the contemporary and newly built Science Classroom Complex (AHC-4, 351) at the Modesto A. Maidique Campus, with its glass windows on one side revealing science labs on every floor, and honeycomb architecture on the other side meeting the latest standards in solar design and efficiency.

SISH continues to provide a focus for planned growth in the College of Arts and Sciences as a component of FIU’s Academic Health Center, in partnership with the Colleges of Medicine, Public Health and Social Work, Nursing and Health Sciences, and Engineering and Computing.
