Decision Sciences and Information Systems

Christos P. Koulamas, Professor and Chair, Ryder Emst Scholar and Senior Associate Dean
Dinesh Batra, Professor
Irma Becerra Fernandez, Associate Professor and Vice President for Engagement
Neera Bhansali, Visiting Assistant Professor
Nancy Borkowski, Clinical Associate Professor and Faculty Director, Healthcare Management MBA Program
Karlene Cousins, Associate Professor
David Darcy, Visiting Clinical Assistant Professor
Gloria Deckard, Associate Professor and Associate Dean, R. Kirk Landon Undergraduate School of Business
Kaushik Dutta, Associate Professor
Joyce J. Elam, Professor, James L. Knight Eminent Scholar and Dean, University College
S. Christopher Ellis, Instructor
Jean Gordon, Visiting Faculty Administrator, Healthcare Management MBA Program
Sushil K. Gupta, Professor and Knight Ridder Center Research Fellow
Keumseok Kang, Visiting Assistant Professor
Richard Klein, Associate Professor
Gerard Klonarides, Instructor
Kuldeep Kumar, Professor
George J. Kyparisis, Professor and Knight Ridder Center Research Fellow
George Marakas, Visiting Professor
Manoel Oliveira, Lecturer and Director of Technology Center
Dasaratha V. Rama, Professor and Knight Ridder Center Research Fellow
Gladys Simpson, Visiting Instructor
Monica Tremblay, Assistant Professor and Faculty Director, MSHIMS
Debra Vander Meer, Associate Professor and Faculty Director, MSMIS
Nicole Wishart, Senior Instructor
Weidong Xia, Associate Professor and Knight Ridder Center Research Fellow

Participating Adjunct Faculty
Susan Clemmons
Stylianos Drakatos
Arvind Gudi
Geraldine Klonarides
Deisell Martinez
Stoyanka Petrova
Thant Syn

Purpose

With the rapid decrease in information technology cost/benefit ratios, the advancement of graphical user interfaces, and the development of the Internet, information systems have become ubiquitous and strategic.

Students in the information systems concentrations use new or existing research methods to help understand the ways in which contemporary organizations design, employ, and manage information systems.

Students in our graduate programs learn the intellectual frameworks and methods used in areas like systems analysis and design (including object-oriented applications), database management, decision support systems (including data warehousing), global electronic commerce, enterprise-wide information systems, and information systems management.

The Department of Decision Sciences and Information Systems offers a Master of Science in Health Informatics and Management Systems (MSHIMS), Master of Science in Management Information Systems (MSMIS), and a concentration in the Ph.D. program.

Master of Science in Health Informatics and Management Systems (MSHIMS)

The M.S. in Health Informatics and Management Systems is a fourteen month graduate degree program designed for information systems professionals, physicians, nurses, other clinical personnel and healthcare managers who want to increase their knowledge of health information technology and management of the complex social and organizational issues surrounding the increased emphasis on managing healthcare quality, efficiency and outcomes through information systems.

Health Informatics integrates the domains of information and telecommunication systems with the organizational domains of healthcare delivery processes and leadership and management principles. The goal of this program is to educate effective developers, users, and managers of health information systems. Students will learn how to implement and use the health information systems needed by hospital and system executives, government planners, public health officials, and other healthcare professionals. Courses will have both an academic and practical perspective, exposing students to both theoretical approaches and real world application.

Admission Requirements

To be eligible for admission to the M.S. Health Informatics and Management Systems program in the Chapman School, prospective students must:

1. Hold a Bachelor's degree or equivalent from an accredited college or university.
2. Achieve a minimum score of 500 on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) or have a minimum of four years of professional experience. If the applicant already completed a graduate degree from an accredited university with a minimum of a 3.0 grade point average (GPA), he or she may be eligible for a GMAT or GRE waiver.
3. Have a minimum upper division grade point average (GPA) of 3.0.
4. Provide a personal statement on the motivation to attend the program, including personal and career goals.
5. Graduate student applicants whose studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version) or 6.5 overall of the International English Language Testing System (IELTS).
6. If applicant is a student in the Graduate Certificate in Healthcare Management, and have completed the first 12 credits with a GPA of 3.25 or higher, he or she may be eligible for admission to the program. Appropriate courses from the Certificate program may be transferred into the degree program.

7. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum program requirements does not guarantee admission.

Graduation Requirements
To graduate with the Master's degree, a student must:
1. Satisfy all University requirements for a Master's degree.
2. Meet the 36 hours required in the M.S. in Health Informatics and Management Systems "Program of Study."
3. Earn an overall "B" (3.0) cumulative Grade Point Average.
4. No courses in which a graduate student earns a grade below "C" may be counted towards any Master's degree program in the Chapman School.
5. Completion Professional Development Seminars I-III (0 credits) offered through the College of Business.

Program Format
Students will complete the program in 14 months. Students will complete this program as a cohort. The program will be offered on Saturdays in 8-week terms. Two courses will be taken each term. The students will be considered full time as within a “semester”, or two terms in the cohort, they will complete 12 graduate credit hours.

Required Courses
- HIM 6627 Health Care Information Management 3
- HSA 6759 Quality Assessment and Outcome in Healthcare 3
- ISM 6205 Database Management 3
- ISM 6326 Information Security and Compliance 3
- ISM 6136 Business Intelligence Applications 3
- HSA 6197 Design and Management of Health Information Systems 3
- HIM 6937 Special Topics 3
- HIM 6685 Electronic Health Record and Clinical Support Systems 3
- HIM 6019 Legal and Ethical Aspects of Healthcare 3
- HSA 6185 Management and Organizational Theory in Health Care 3
- HSA 6186 Leadership and Organization Behavior in Health Care Systems 3
- ISM 6930 Special Topics in Management Information Systems 3
- Professional Development Seminars I, II, III

Professional Development Seminars
Seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration. There will be team-building activities which include classroom exercises in group decision-making and problem-solving. Challenging outdoor exercises will be included to help participants build the skills they will need to work together in the program and to succeed in today's team-based organizations. Students will also work with a presentation and writing skills coach to improve the communication and writing skills that are critical to managerial success.

As part of the Practicum, the student will be required to conduct a research project on a specific health informatics and management problem in a community or institutional setting. A formal proposal will be prepared and approved by faculty. Students will be expected to demonstrate during the course of this research project that they can implement theoretical knowledge and skills learned earlier in courses on health informatics and management. Students will be expected to make a project presentation.

Seminars will be mandatory, non-credit.

Professional Development Seminar I
- Team Building – Ropes Course 8hrs
- Career Development 6hrs
- Communication Skills Building 8hrs

Professional Development Seminar II
- Presentation Skills 8hrs

Professional Development Seminar III
- Writing Skills 8hrs

Professional Development Seminar IV
- Practicum – Research Project 75-100hrs

For more information, please contact the Program Manager at mshims@fiu.edu or (305) 779-7980.

Master of Science in Management Information System ( MSMIS)

Our Master of Science in Management Information Systems ( MSMIS) is the only program of its kind that was actually designed with strategic direction from the top CIOs in South Florida. In conjunction with our world-renowned faculty, our advisory board of top IT professionals was instrumental in creating a new and unique master’s program that delivers knowledge critical to the success of future Chief Information Officers (CIOs).

To better prepare you to become a CIO, we offer you an integrated curriculum that combines technical and IT management skills, including electronic commerce management and strategy, database management, systems analysis and design, project management, knowledge management, and business intelligence. This approach enables you to understand the complexities of today's most critical business systems and to manage IT resources to produce the best results for your organization.

Unique Features
- Complete the program in 12 months.
- Acquire a unique combination of technical and IT management skills.
- Learn high-demand technologies such as Teradata, SAP, Rational Rose, .Net Java, PL/SQL, UML, XML.
- Gain hands-on application experience in state-of-the-art technology labs.
- Build a future network of highly-qualified professionals and peers in the IT field.
- Improve your soft skills by taking mandatory professional development seminars focused on leadership, team-building skills, oral and written presentation skills, and career preparation.
Admission Requirements

To be eligible for admission to the MSMIS degree program in the Chapman School, prospective students must:

1. Hold a Bachelor’s degree or equivalent from an accredited college or university.
2. Show high promise of success in graduate work as determined by the faculty based on a minimum score of 500 on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) or demonstrate at least four years of IT (Information Technology) related work experience. If the applicant already completed a graduate degree from an accredited university with a minimum of a 3.0 grade point average (GPA), or is entering a business master’s program under a special agreement for admissions with specific foreign universities, he or she would be eligible for a GMAT or GRE waiver at the discretion of the faculty director.
3. Have a minimum upper division grade point average (GPA) of 3.0.
4. Provide a personal statement on the motivation to attend the program, including personal and career goals.
5. Graduate student applicants whose studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version) or 6.5 overall of the International English Language Testing System (IELTS).
6. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum program requirements does not guarantee admission.

Professional Development Seminars

Seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration. There will be team-building activities which include classroom exercises in group decision-making and problem-solving. Challenging outdoor exercises will be included to help participants build the skills they will need to work together in the program and to succeed in today’s team-based organizations. Students will also work with a presentation and writing skills coach to improve the communication and writing skills that are critical to managerial success.

Seminars will be mandatory, non-credit.

**Professional Development Seminar I**
- Team Building – Ropes Course: 8hrs
- Career Development: 6hrs
- Working in Teams: 4hrs

**Professional Development Seminar II**
- Presentation Skills: 8hrs

**Professional Development Seminar III**
- Writing Skills: 8hrs

To complete MSMIS degree, students need to successfully complete all 12, three-credit hour courses for a total of 36 credit-hours, and maintain a B average (3.0 GPA).

For additional information, please visit [http://msis@fiu.edu](http://msis@fiu.edu) or contact the Program Manager at (305) 779-7911 or [msis@fiu.edu](mailto:msis@fiu.edu).

Master of Science in Management Information System/Master of Business Administration Joint Degree Program

The Department of Decision Sciences and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are offering a joint degree program culminating in both a Master of Business Administration (MBA), and a Master of Science in Management Information Systems degree (MSMIS). Under the joint degree program, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree program will use existing faculty, courses, and resources. Important criteria relating to the joint degree program are as follows:

1. Candidates to the joint degree program must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.

2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MBA or MSMIS students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.

3. Candidates must satisfy all requirements for each degree. To obtain the MSMIS degree, the student will be required to take twelve (12) MIS courses. This includes the one MIS course in the MBA core program, plus eleven MIS courses from the MSMIS program, for a total of 36 credit hours. Four of these eleven MSMIS courses will be used to satisfy part of the elective requirements of the MBA program. To obtain the MBA degree, the student will have to fulfill all the MBA program requirements. The two degrees
will have five common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSMIS courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSMIS degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSMIS curriculums.

4. Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate. With the joint degree program students will take a total of 76 credit hours to get both degrees. Without the joint degree program students will need to take 91 credit hours to get both degrees. Thus, MBA students who have taken twelve credits of MSMIS common courses may obtain an MSMIS degree with an additional 21 credits. MSMIS students who have taken three credits of a MBA core MIS course may obtain an MBA degree with only 40 credits.

For additional information, contact the Evening MBA office at (305) 348-3256 or the MSMIS Office at (305) 348-6852.

**MIS Concentration in the PH.D. Program**

The Department of Decision Sciences and Information Systems offers a Management Information Systems (MIS) concentration in the doctoral program in Business Administration. The concentration requires completion of the following six courses (18 credit-hours):

- ISM 7935 Foundations of IS Research
- ISM 7306 Seminar on Strategy and Information Resource
- COP 7545 File and Database Systems
- ISM 7126 Seminar on Systems Analysis
- ISM 7406 Decision Support Systems
- ISM 7xxx Enterprise Information Systems

Please contact the Ph.D. program director, Professor Ronald M. Lee for further requirements and details.

**Graduate Certificate in Healthcare Management**

The objective of this graduate certificate is to provide individuals with a basic understanding of the context, management and reimbursement issues for health services organizations.

**Admission Requirements**

Students must have an earned baccalaureate degree with a GPA of 2.75 or higher. This certificate is open to both degree-seeking students and those who are not currently enrolled at FIU.

**Prerequisite:**

Computer skills including: Word, Excel and PowerPoint

**Program of Study (15):**
