Elisa Trucco, Associate Professor
Chockalingam Viswesvaran, Professor
Ryan Winter, Associate Teaching Professor
Chit Yuen Yi, Assistant Teaching Professor

Master of Science in Cognitive Neuroscience

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Cognitive Neuroscience based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree):

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The M.S. in Cognitive Neuroscience requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master’s project based upon the student’s original research. A maximum of 6 credits of post-baccalaureate coursework may be transferred from another institution with the approval of the program director. M.S. in Cognitive Neuroscience students are required to complete the following minimum requirements. The remaining credits to complete the post-baccalaureate 36-credit requirement can be drawn from supervised research, directed individual study, electives, or the PSY 5938 Current Topics in Neuroscience Series.
1. **Common core courses in Statistics/Methodology** (Minimum 9 credits)
   Students must take all three of the following 3-credit courses or a course approved by the program director:
   - PSY 5939 Special Topics in Psychology (Quantitative Methods I)
   - PSY 5939 Special Topics in Psychology (Quantitative Methods II)
   - PSY 5246C Multivariate Analysis in Applied Psychological Research

2. **Cognitive Neuroscience (CN) Content Courses** (Minimum 6 credits)
   Students must take 2 courses drawn from the following 3-credit courses or a course approved by the program director:
   - DEP 5058 Biological Basis of Behavior Development
   - EXP 5508 Applied Cognitive Psychology
   - EXP 5527 Memory and Consciousness
   - PSB 6247 Biological Bases of Behavior
   - PSB 6215 Human Neuroanatomy
   - CBH 5256 Animal Cognition
   - CLP 6426 Neuropsychology
   - PSB 6350 Cognitive Neuroimaging Methods I
   - PSB 6351 Cognitive Neuroimaging Methods II
   - PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
   - PSB 6035 Introduction to Computational Cognitive Neuroscience
   - PSB 5247 Neurobiology of Learning and Memory

3. **Electives** (Minimum 3 credits approved by the program director)
   - Students may choose electives from the list of content courses provided above or identify electives outside of the department based on their research interest.

4. **Current Topics** (Variable Credits)
   - Students must take PSY 5938 Current Topics in Neuroscience Series (0-1) every Fall and Spring while enrolled in the Doctoral Program.

5. **Master's Project** (6 Credits PSY 5918 Supervised Research)

**Master of Science in Psychology: Major in Behavior Analysis**

The Behavior Analysis area focuses on the experimental, theoretical, methodological, and applied analysis of behaviors of individuals, their antecedents and their consequences, and how the changes are produced that denote different types of learning or learning problems. The processes at issue have become efficient bases for understanding, and for changing, conduct problems and such behavioral disorders as are termed Autism Spectrum Disorder. Students completing the M.S. degree and having received the required amount of supervised fieldwork experience, may qualify to sit for the Board Certified Behavior Analyst (BCBA) examination.

The Behavior Analysis major consists of core, knowledge-based, courses, a selection of seminars and supervised fieldwork. Also encouraged are involvements in program events, regional and national conference attendance and presentations.

**Admission Requirements**

To be admitted into the Master's degree program in Behavior Analysis, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.

*These are minimum requirements. Admission is competitive.

**Degree Requirements**

The Master of Science in Behavior Analysis requires a minimum of 45 semester credits of graduate work beyond the baccalaureate. Students must maintain a minimum overall GPA of 3.0 and earn at least a B- in all courses. If a grade lower than a B- is earned, the student may be allowed to repeat the course, at the discretion of the program.

**Required Courses**

The Master’s requires 45 credit hours beyond the Bachelor's degree. This includes 6 credits of departmental common core requirements for the M.S. degree. Students complete practical experience and an applied research project.

1. Common core (statistics/methodology) courses (6 credits)
2. Behavior analysis content courses (21 credits drawn from the following list of 3 credit courses, and approved by the program director):

   - EAB 6770 Behavior Technologies
   - EAB 5701 Behavior Assessments
   - EAB 5797 Single-Case Research Methods
   - EAB 6005 Advanced Concepts and Principles of Applied Behavior Analysis
   - EAB 6717 Science and Practice of Verbal Behavior
   - EAB 5700 Introduction to the Concepts and Principles of Applied Behavior Analysis
   - EAB 6780 Ethical Code in Behavior Analysis
   - EAB 5060 Behavior Analysis Career Development

3. A combined 9 credits in the courses below:
   - EAB 5917 Supervised Research in Behavior Analysis
   - EAB 5937 Special Topics in Behavior Analysis
   - EAB 6941 Practicum in Behavior Analysis (9 credits)

*The program will enroll students in the proper number of credits.
Master of Science in Psychology: Major in Clinical Science in Child and Adolescent Psychology

The clinical science in child and adolescent psychology major is consistent with the clinical science model of clinical psychology training articulated by the Academy of Psychological Clinical Science. Clinical Science is defined as a "psychological science directed at the promotion of adaptive functioning; at the assessment, understanding, amelioration, and prevention of human problems in behavior, affect, cognition or health; and at the application of knowledge in ways consistent with scientific evidence." The emphasis on the term "science" underscores the commitment to evidence based approaches to the assessment and treatment of human problems, as well as the integration of research and theory of other relevant sciences. The emphasis on the term "science" also underscores that training in clinical science focuses on training students for careers in which they skillfully produce, and/or apply scientific knowledge. The focus of the major is on child, adolescent and family clinical psychology within a multicultural context.

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Clinical Science in Child and Adolescent Psychology based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree).

1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 GPA or higher during the last two years of the undergraduate program and a combined score (verbal and quantitative) of 300 or higher on the Graduate Record Exam.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Receive approval from the Department Graduate Education Committee.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Master of Science Major in Clinical Science requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a non-thesis research project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Director of Clinical Training.

Required Courses

In order to obtain their M.S., clinical science doctoral students will be required to complete 6 credits of departmental common core course requirements, along with more specialized content courses and a course involving directed independent effort, as listed below:

1. Common core requirements (9 credits of statistics/methodology courses)
   - PSY 5939 Special Topics in Psychology: Quantitative Methods I

Master of Science in Psychology: Major in Counseling Psychology

The Counseling Psychology Masters major area is designed to prepare students for the independent and licensed professional practice of counseling and psychotherapy. The major offers students a solid foundation in counseling psychology that focuses on evidence-based practices in mental health counseling. Opportunities for specializing in a range of clinical problems and diverse populations are offered through faculty guided and clinical training in the FIU Center for Children & Families and/or supervised clinical experience in community-based clinical settings.

Completion of the major requirements leads to a Master of Science in Psychology and eligibility for a license to practice as a Mental Health Counselor (LMHC) in Florida. The core curriculum is intended to engage students in the advanced study of psychology with a focus on developing applied counseling for working in multicultural environments with populations that range across the life span from childhood to later adulthood.

Admission Requirements*

To be admitted into the Master's degree program in Counseling Psychology, a student must:

1. Hold a Bachelor's degree in Psychology or in a relevant discipline from an accredited college or university.
2. Applicants with an out of field major must have completed four courses in (1) introductory psychology, (2) abnormal psychology or theories of personality, (3) statistics, and (4) psychology research methods.
3. Have a 3.0 in the last 60 credits of upper-level work. Students with nonpsychology majors may apply for admission if they have completed specific courses
4. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
The University Graduate School offers a recommendation form, though this is not required. Letters should be written on letterhead or stationery.

5. Submission of a CV or Resume is required; and should include previous experience, education, honors, awards, interests, community service and achievements.

6. Submission of two academic writing samples is required; one must be academic, and the other may be work-related.

7. For International students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). See FIU Graduate Admissions Requirements for more information; Minimum TOEFL score: 550 (paper) or 80 (internet); Minimum IELTS score: 6.5; FIU's institutional code is 5206

8. Submit a brief video statement which includes a discussion of your educational and career objectives and the specific relationship of the master’s degree to achieving those objectives

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Master of Science in Counseling Psychology requires a minimum of 60 semester credits of graduate work beyond the baccalaureate. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Advisory Committee.

Required Courses

The Counseling Psychology curriculum consists of 60 credit hours of graduate study, as required for licensure as a mental health counselor by the Florida Board of Clinical Social Work, Marriage & Family Therapy, and Mental Health Counseling that includes coursework, clinical training, and a passing score on the Counselor Preparation Comprehensive Examination (CPCE).

1. **Common Core (Statistics/Methodology/Assessment) Courses (9 credits)**
   - CLP 5166 Advanced Abnormal Psychology
   - CLP 5931 Ethical Code in Psychological Practices
   - CLP 6436 Introduction to Psychological Assessment
   - CLP 6498 Diagnosis and Treatment of Sexual Disorders
   - CYP 5534 Groups as Agents of Change
   - CYP 6526 Psychology Research Methods and Program Evaluation
   - CYP 6536 Principles and Methods of Psychological Consultation
   - CYP 6766 The Psychology of Cross Cultural Sensitization
   - CYP 6936 Current Issues in Community Psychology
   - DEP 5069 Applied Life Span Developmental Psychology
   - PCO 5311 Theory, Research, and Treatment of

PCO 6206 Addictive Behavior
PSY 5939 Special Topics
PCO 6945 Case Conceptualization for Counselors
CLP 6449 Career Development in Adolescence & Adulthood
PSB 6247 Biological Basis of Behavior

3. Supervised clinical practicum/internship courses (15 credits)

4. Passing score on the Counselor Preparation Comprehensive Examination.

Master of Science in Psychology: Major in Developmental Science

The program in Developmental Science provides students with the skills to describe and explain change over time in humans and other organisms. Students gain knowledge of cutting-edge developmental methods and theories while developing expertise in their specialty topic area. A unique aspect of the program is a focus on advanced training in statistics/methodology beyond the department common core courses. Students can specialize in any phase of the lifespan or on any issues or topics that span phases of the lifespan.

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Developmental Science based on the following criteria (applications will not be accepted and students will not be admitted for a terminal MS degree):

1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Master of Science in Developmental Science requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master’s project based upon the student’s original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the student’s advisor.
Required Courses
Developmental Science MS students are required to complete the 9 credits of departmental common core courses, along with more specialized content and breadth courses and a course involving supervised research, as listed below:

1. Common core courses (9 credits)
   - PSY 5939 Special Topics in Psychology: Quantitative Methods I
   - PSY 5939 Special Topics in Psychology: Quantitative Methods II
   - PSY 5246C Multivariate Analysis in Applied Psychological Research

2. Theory and methods requirement (9 credits) including one course in advanced statistics/methods from the list below, or another course approved by the program director:
   - DEP 5608 Theoretical Perspectives in Developmental Psychology
   - PSY 5605 History & Systems

Advanced Statistics/Methods (choose 1)
- DEP 5796 Developmental Methods
- PSY 5930 Qualitative Research Methods in Psychology
- PSY 5939 Special Topics in Psychology: Longitudinal Data Analysis
- PSY 5939 Special Topics in Psychology: Introduction to SEM for Psychological Research
- PSY 5939 Special Topics in Psychology: Categorical Data Analysis
- PSY 5939 Special Topics in Psychology: Missing Data
- PSY 5939 Special Topics in Psychology: Multilevel Models
- PSY 5939 Special Topics in Psychology: Statistical Graphics and Communication

3. Developmental Science breadth requirement (6 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):
   - DEP 5099 Proseminar in Infancy, Childhood and Adolescence
   - DEP 5405 Proseminar in the Psychology of Adulthood and Aging
   - DEP 5936 Integrating Theory and Research in Developmental Science.
   - DEP 6046 Cross Cultural Perspectives of Emerging & Established Adulthood Development
   - DEP 5058 Biological Basis of Behavior Development
   - DEP 5065 Cognitive Development
   - DEP 6645 Cognition and Language
   - DEP 5275 Seminar in Psychosocial Development
   - DEP 7096 Seminar in Psychology of Life-Span Social Development

4. Electives (6 credits from any graduate-level psychology course or a course approved by the program director)

5. Master's Project (6 credits of supervised research)

Master of Science in Psychology: Major in Industrial-Organizational Psychology

The Industrial Organizational (I/O) Psychology major focuses on issues such as the psychology of Human Resource Management, Group Behavior, Cultural Diversity in Organizations, Personality, Team Effectiveness, Personnel Selection, Leadership, Organizational Stress, and Training and Development. The major emphasizes a commitment both to research and application as a part of individual specialty area development. Students master a series of core courses designed to provide a thorough grounding in theory, methodology, and content in applied and basic research in psychology. These courses are taught by faculty who are involved in research and practice in the relevant areas.

In addition, seminars reflecting the specialized foci of the Industrial-Organizational area faculty are offered. There are also opportunities for practice and occasional internships for students to gain firsthand experience in the application of psychological knowledge to real challenges of organizations. Students are also encouraged to participate in professional conferences.

Admission Requirements*
To be admitted into the Master’s degree program in I/O Psychology, a student must:
1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.

*These are minimum requirements. Admission is competitive.

Degree Requirements
The Master of Science in Industrial and Organizational Psychology requires a minimum of 36 semester credits of graduate work beyond the baccalaureate. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Advisory Committee.

Required Courses
The Master's in I/O Psychology requires 36 credit hours beyond the Bachelor's degree. This includes 6 credits of departmental common core requirements for the M.S. degree. Students have the option of following either a thesis or a non-thesis option. Students planning to apply to a doctoral program must elect the thesis option.

1. Common core (statistics/methodology) courses plus an additional statistics/methods course (9 credits)
2. I/O content courses (12 credits drawn from the following 3 credit courses and approved by the program director):

   - INP 5095 Proseminar in Industrial Psychology
   - INP 5136 Psychology of Legal Consultation
   - INP 6090 Applied Psychology and Organizational Consulting
   - INP 6115 Psychology of Culture and Organizations
INP 6216  Personnel Selection  
INP 6235  Applied Psychology of Training and Development  
INP 6611  Organizational Stress  
INP 6940  Strategies and Methods of Applied Psychological Research  
PSY 5939  Special Topics  
SOP 5058  Proseminar in Social Psychology  
SOP 5616  Social Psychology of Organizations  
3. Supervised research/internship (3 credits)
4. Electives (6 credits)
5. PSY 6971 Masters thesis (thesis option) or additional content courses (non-thesis option) (6 credits)

Master of Science in Psychology: Major in Legal Psychology

Legal psychology is a growing and popular field that sits at the nexus of psychology and law. This program offers students broad training in psychology and in-depth training in legal psychology as well as more traditional concentrations (e.g., social psychology, cognitive psychology). Research, professional, and pedagogical skills are strongly emphasized. Students may also obtain significant field experience in the legal system by participating in applied research, expert witness cases, providing assistance to trial consultants, and through other formal training experiences, such as collaborations with FIU’s law school.

Admission Requirements*

Students will apply to be admitted directly to the doctoral program in Legal Psychology based on the following criteria (applications will not be accepted and students will not be admitted for a terminal degree).
1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
4. Receive approval from the Departmental Graduate Education Committee.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Master of Science Major in Legal Psychology requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a thesis research project based upon the student’s original research.

Students who have already completed a thesis in a relevant area of research while enrolled in another program, with program director approval can have the thesis project requirement waived. 9 credits of common core requirements are included in these requirements in order to meet the Board of Governors' Policy on degree structures.

Required Courses

In order to obtain their M.S., Legal Psychology doctoral students will be required to complete 36 credit-hours of coursework, as listed below:
5. International graduate student applicants whose native language is not English are required to submit a score for the TOEFL as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Master of Science in Organizational Sciences requires 36 semester credits of coursework at the graduate level and includes a terminal project focused on a workplace issue.

Required Courses

Students will complete 6 credits of coursework based on departmental core course requirements:

- PSY 5939 Quantitative Methods in Psychology I
- SOP 5058 Proseminar in Social Psychology

Students will also complete the following 30 credits of content courses:

- INP 5095 Pro Seminar in Industrial Psychology
- SOP 5616 Social Psychology of Organizations
- INP 6216 Personnel Selection
- INP 6235 Applied Psychology of Training and Development
- INP 6611 Organizational Stress
- INP 6940 Strategies and Methods of Applied Psychological Research
- INP 6115 Psychology of Culture and Organizations
- INP 6090 Applied Psychology and Organizational Consulting
- PSY 5908 Directed Individual Study

Doctor of Philosophy in Cognitive Neuroscience

This program will train students to become experts in the study of the neuroscience of cognition and behavior. The program has a central focus in training of scholars and professors of Cognitive Neuroscience, which is a rapidly growing research area in Psychology. Thus, the primary goal of the program is to equip students with the skills necessary to function as academic and/or research scientists. As such, the program provides a rigorous, broad-based graduate education with an emphasis on topic-specific skills in neuroscience research methodology and data analysis; cognitive, developmental, and behavioral neuroscience; learning and memory; and neuropsychological disorders, combined with broader STEM-related skills.

Students benefit from the diversity of faculty’s areas of interest and expertise that converge to provide a well-rounded training program in cognitive neuroscience. Hands-on research experience is an essential part of the training, and students become involved in research at an early point in their graduate training by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students will receive guidance in every aspect of conducting research, including developing ideas, designing and conducting studies, and dissemination, presenting papers at national conferences and publishing papers in scientific journals. In addition, we emphasize the students’ development in grant writing skills, a necessary component of a successful research career.

Admission Requirements

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Cognitive Neuroscience requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a master’s project and a dissertation based on the student’s original research. A maximum of 36 credits may be transferred from a completed master’s degree program with the approval of the program director. Cognitive Neuroscience doctoral students are required to complete the following minimum requirements. The remaining credits to complete the post-baccalaureate 75-credit requirement can be drawn from supervised research, directed individual study, dissertation research, electives, or the PSY 5938 Current Topics in Neuroscience Series.

1. Common core courses in Statistics/Methodology (Minimum 9 credits)

   Students must take all three of the following 3-credit courses or a course approved by the program director:
   - PSY 5939 Special Topics in Psychology (Quantitative Methods I)
   - PSY 5939 Special Topics in Psychology (Quantitative Methods II)
   - PSY 5246C Multivariate Analysis in Applied Psychological Research

2. Cognitive Neuroscience Content Courses (Minimum 6 credits)

   Students must take 2 courses drawn from the following 3-credit courses or a course approved by the program director:
   - DEP 5058 Biological Basis of Behavior Development
   - EXP 5667 Cognitive Neuroscience
Doctor of Philosophy in Psychology: Major in Clinical Science in Child and Adolescent Psychology

The clinical science in child and adolescent psychology major is consistent with the training model articulated by the Academy of Psychological Clinical Science. Clinical Science is defined as a "psychological science directed at the promotion of adaptive functioning; at the assessment, understanding, amelioration, and prevention of human problems in behavior, affect, cognition or health; and at the application of knowledge in ways consistent with scientific evidence." Emphasis on the term "science" underscores the commitment to evidence based approaches to the assessment and treatment of child and adolescent problems, as well as the integration of research and theory of other relevant sciences. Emphasis on the term "science" also underscores that training facilities careers in which scientific knowledge is skillfully produce, applied, or both. The focus of the clinical science major is on child, adolescent and family clinical psychology within a multicultural context.

Students admitted to the major are expected to maintain full-time status and to become involved in research from the onset of their entry into the program by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students also are guided and encouraged to publish their individual research projects, to seek their own external funding to help support their research, and to present their work at professional conferences. Students receive clinical and teaching opportunities as part of their graduate training, within the context of continued student advancement as clinical scientists in child and adolescent psychology.

Admission Requirements*

To be admitted into the Clinical Science doctoral program, a student must:

1. Hold a Bachelor's or Master's degree in psychology from an accredited college or university or submit Graduate Record Exam - Psychology Subject Test Score.
2. Have a 3.0 average or higher GPA during the last two years of the undergraduate program, or, for students with a terminal Master's degree in psychology, have a minimum 3.5 average or higher GPA.
3. Arrange for their application to the University Graduate School to be accompanied by three letters of recommendation evaluating potential for graduate work.
4. Include with their application to the University Graduate School a brief personal statement outlining their experiences, reasons for interest in doctoral training in psychological clinical science, and career goals.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

Admission into the Clinical Science Doctoral Program in Child and Adolescent Psychology is competitive. Successful applications have significant research experience and strong letters of recommendation. Enrolled students evidence interest in psychological clinical science by clear articulation (in personal statement and interviews) of research questions, a desire for a clinical science career, strong record of academic achievement, and professional accomplishment described in personal statement and recommendations from past mentors.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. The Major in Clinical Science in Child and Adolescent Psychology requires an additional 15 credits of clinical practicum (90 credits total) and a year-long internship. We adhere to the UGS policy regarding credit transfer toward a doctoral degree. However, it is policy of the Clinical Science Program to require all students to participate in the core clinical science courses. Students may apply to transfer credits for courses that overlap substantively in learning objectives and content with core analytic courses or breadth requirements. Research and practicum credits may be considered for transfer as well.

Required Courses

Clinical Science students are required to complete the 9 credits of departmental core course requirements

- EXP 5508 Applied Cognitive Psychology
- EXP 5527 Memory and Consciousness
- PSB 6247 Biological Bases of Behavior
- PSB 6215 Human Neuroanatomy
- CBH 5256 Animal Cognition
- CLP 6426 Neuropsychology
- PSB 6350 Cognitive Neuroimaging Methods I
- PSB 6351 Cognitive Neuroimaging Methods II
- PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
- PSB 6035 Introduction to Computational Cognitive Neuroscience
- PSB 5247 Neurobiology of Learning and Memory

Electives
- Students may choose electives from the list of content courses provided above or identify electives outside of the department based on their research interest.

Current Topics (Variable Credits)
- Students must take PSY 5938 Current Topics in Neuroscience Series (0-1) every Fall and Spring while enrolled in the Doctoral Program.

Master's Project (6 Credits PSY 5918 Supervised Research)

Supervised Research (Variable Credits)
- PSY 5918 Supervised Research (VAR)

Comprehensive exam

Ph.D. Dissertation (Minimum 15 credits)
Doctor of Philosophy in Psychology: Major in Applied Social and Cultural Psychology

Doctoral Admission Requirements

To be admitted into the Applied Social and Cultural Psychology doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Submit a current resume or CV.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 9 credits may be transferred into the Applied Social and Cultural Psychology major from a completed master's degree program with the approval of the major director. A student must enroll for dissertation credit after completing all coursework, passing the candidacy examination, and being advanced for candidacy. Dissertation credits cannot be taken before advancement to candidacy. After a doctoral student is admitted to candidacy, continuous registration for at least three dissertation credits is required until the dissertation requirement is fulfilled.

Required Courses

Applied Social and Cultural Psychology doctoral students are required to complete the 15 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below, for a total of 75 credits:

Common core courses (12 credits):

- PSY 5939 Special Topics in Psychology: Quantitative Methods I
- PSY 5939 Special Topics in Psychology: Quantitative Methods II
- PSY 5246C Multivariate Analysis in Applied Psychological Research
- CLP 5007 Psychological Clinical Science I: Historical Perspectives and Current Controversies
- PSY 6219 Research Methods in Clinical Child Psychology
- PSY 5605 Proseminar: History and Systems of Psychology
- CLP 6471 Assessment and Treatment I: Internalizing Problems
- CLP 6472 Assessment and Treatment II: Externalizing Problems
- CLP 6473 Assessment and Treatment III: Developmental, Learning and Pediatric Disorders
- CLP 6530 Dissemination and Implementation of Research
- PSY 5246C Multivariate Analysis in Applied Quantitative Methods II
- PSY 5939 Special Topics in Psychology: Structural Equation Modeling
- PSY 5939 Special Topics in Psychology: Categorical Data Analysis
- PHC 6056 Longitudinal Health Data Analysis
- PHC 6062 Systematic Reviews and Meta-Analysis
- SOP 5058 Proseminar in Social Psychology
- ASCP Content Courses (18 credits):

- PSY 5980 Ph.D. Dissertation (15 credits)
- Internship (CLP 6948 Clinical Internship)
PSY 5605 Proseminar in History and Systems of Psychology
SOP 5316 Theories and Methods of Cross-Cultural Research
PSY 6919 Current Research Topics in Psychology
CLP 5007 Psychological Clinical Science I: Historical Perspectives and Current Controversies
CLP 6530 Dissemination and Implementation of Research
CYP 6936 Current Issues in Community Psychology

Breadth Requirements (9 credits drawn from the following list of 3 credit courses, or other courses approved by the major director, to fulfill training in Identity (3 credits); Social Justice (3 credits); and Methods (3 credits):

Identity (choose 1)
DEP 5325 Proseminar in Identity Development
or
WST 5936 Women and Leadership

Social Justice (choose 1)
SOP 5726 Proseminar on the Psychology of Stereotyping, Prejudice and Discrimination
or
CYP 6766 The Psychology of Crosscultural Sensitization in a Multicultural Context

Methods (choose 1)
PSY 5930 Qualitative Research Methods in Psychology
or
CYP 6526 Psychology Research Methods and Program Evaluation

1. Electives (6 credits, drawn from courses within or outside of the department, approved by the major area director, to facilitate depth of independent research)
2. Supervised research courses (15 credits)
3. Master’s Project
4. Comprehensive exam
5. PSY 7980 Ph.D. Dissertation (15 credits)
6. All students must also complete specific major requirements one semester prior to graduation. This will include:
   a. Diversity Statement
   b. One of the following written documents:
      i. Manuscript for publication that demonstrates engagement in a community-based and/or participatory action research project
      ii. Reflective essay demonstrating a leadership role in a community-based and/or participatory action research project
   c. One of the following public engagement activities:
      i. Public workshop
      ii. White paper
      iii. Policy Brief
      iv. Op-Ed

Doctor of Philosophy in Psychology: Major in Developmental Science

The program in Developmental Science provides students with the skills to describe and explain change over time in humans and other organisms. Students gain knowledge of cutting-edge developmental methods and theories while developing expertise in their specialty topic area. A unique aspect of the program is a focus on advanced training in statistics/methodology beyond the department common core courses. Students can specialize in any phase of the lifespan or on any issues or topics that span phases of the lifespan.

Students begin working in research upon program entry and develop a marketable research portfolio under the supervision of one or several faculty members. Students are guided to publish their research projects and to present their work at professional conferences.

Admission Requirements*

To be admitted into the Developmental Science doctoral program, a student must:
1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student’s original research. A maximum of 36 credits may be transferred from a completed master’s degree program with the approval of the program director.

Required Courses

Developmental Science doctoral students are required to complete the 9 credits of common core courses established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:
1. Common core courses (9 credits)
   PSY 5939 Special Topics in Psychology:
Doctor of Philosophy in Psychology: Major in Industrial-Organizational Psychology

The Industrial Organizational (I/O) Psychology major focuses on issues such as the psychology of Human Resource Management, Group Behavior, Cultural Diversity in Organizations, Personality, Team Effectiveness, Personnel Selection, Leadership, Organizational Stress, and Training and Development. Program requirements include core courses that provide a strong knowledge base and a selection of optional seminars that allows specialization and applied experience. Idea exchange and research collaboration among students are goals of many of these courses. These courses are taught by faculty who are involved in research and practice in the relevant areas.

In addition to master’s and doctoral dissertation projects, activity in a variety of research projects is highly encouraged. Involvement with I/O program events, applied internships, conference attendance and presentations is also encouraged.

Admission Requirements*

To be admitted into the I/O Psychology doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed masters degree program with the approval of the Advisory Committee.

Required Courses

Industrial/Organizational Psychology doctoral students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

1. Common core courses (9 credits)
2. Substantive I-O content courses (21 credits drawn from the following 3 credit courses and approved by the program director):

- INP 5095 Proseminar in Industrial Psychology
- INP 5136 Psychology of Legal Consultation
- INP 5090 Applied Psychology and Organizational Consulting
and most notably, the overlap between law and methodology and statistics, and in related areas of law, research in this area revolves mostly around three academic, government, or legal consulting settings. with the goal of training students to conduct research in detecting deception. The program is research-oriented, and social psychology. As such, training is provided in traditional areas of psychology: cognitive, developmental, including areas such as: jury decision-making, investigative interviewing, eyewitness memory, and detecting deception. The program is research-oriented, with the goal of training students to conduct research in academic, government, or legal consulting settings. Research in this area revolves mostly around three traditional areas of psychology: cognitive, developmental, and social psychology. As such, training is provided in these basic areas of psychology, along with training in methodology and statistics, and in related areas of law, and most notably, the overlap between law and psychology.

Program requirements include seminar courses in basic psychological processes (e.g. cognition, social psychology), statistics and methodology, and legal psychology. While taking courses, students conduct independent research and collaborate with other faculty and students. Students are encouraged to work on projects with a variety of colleagues. In addition to taking formal courses, students also have the opportunity to participate in weekly, informal research meetings with other students and faculty.

**Admission Requirements**

To be admitted into Legal Psychology doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.

7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

**Degree Requirements**

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed masters degree program with the approval of the Advisory Committee.

**Required Courses**

Legal Psychology doctoral students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

1. Common core courses (9 credits)
2. 6 courses (total of 18 credits) on basic psychology, applied legal psychology approved by the program director):

   CJE 5024 Violent Crime
   CJL 6418 Law and Social Control
   CLP 5185 Current Issues in Mental Health
   CLP 6395 Forensic Psychology
   CLP 6438 Clinical Psychological Assessment
   DEP 5068 Applied Life Span Developmental Psychology
   DEP 5099 Proseminar in Infancy, Childhood, and Adolescence
   EXP 5099 Proseminar in Experimental Psychology
   EXP 5527 Memory and Consciousness
   EXP 5508 Applied Cognitive Psychology
   INP 5095 Proseminar in Industrial Psychology
   INP 5136 Psychology of Legal Consultation
   INP 6115 Psychology of Culture and Organizations

   INP 6940 Strategies and Methods of Applied Psychological Research
   POS 6286 Judicial Research
   POS 6612 Seminar US Supreme Court
   PSY 5939 Special Topics
   SOP 5058 Proseminar in Social Psychology
   SOP 6098 Proseminar in Legal Psychology
   SOP 6441 Seminar in Social Cognition
   SOP 6752 Psychology of Juries
   LAW 6310 Alternative Dispute Resolution
   LAW 6112 Criminal Procedure
   LAW 6114 Advanced Dispute Resolution
   LAW 6330 Evidence
   LAW 6710 Family Law
   LAW 6381 Interviewing and Counseling
   LAW 6363 Trail Practice
   LAW 7549 Employment Discrimination
   LAW 6714 Children and the Law
   LAW 6253 Comparative Criminal Law
Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain each degree if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.

2. The joint degree pathway is not open to students who have already earned one degree.

3. For law students, enrollment in the M.S. program is required no later than the completion of 63 credit hours in the J.D. program. For M.S. students, enrollment in the J.D. program is required no later than the third semester after beginning the M.S. program. For purposes of this paragraph, a summer session is counted as half a semester.

4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The College of Arts, Sciences and Education will allow 9 credit hours toward the M.S. degree for successful completion of 9 credit hours of upper level law school electives from a list of courses approved by the Chair of the Department of Psychology. These 9 credit hours of law classes will be in lieu of 9 hours of courses required for the M.S. degree with the major in Legal Psychology as approved for each student by the Legal Psychology faculty committee, but not to include the required statistics classes of Proseminars. If the student is pursuing a non-thesis M.S. with the major in Legal Psychology, 6 of the 9 credit hours of law classes will be in lieu of the six credit hours normally allotted to the thesis. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the M.S. curriculum upon completion of the M.S. degree curriculum with a grade point average of 3.0 or higher.

5. A student enrolled in the joint degree pathway may begin the student’s studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time students must take the first three semesters of law study consecutively. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.

6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements of both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.

7. Students in the joint degree pathway will be eligible for the graduate teaching assistantships and research assistantships in the College of Arts, Sciences and Education on the same basis as other M.S. students, subject to the guidelines and restrictions set by the College of Arts, Sciences and Education.

Non-Thesis Option with a Major in Legal Psychology

The new non-thesis option culminating in the award of a Master of Science in Psychology, with a major in Legal Psychology, from the College of Arts, Sciences and Education complements the joint degree pathway that awards a Master of Science from the College of Arts, Sciences and Education and a Juris Doctor degree awarded by the College of Law. Essential criteria relating to this non-thesis option are as follows:

1. The non-thesis option is available only to graduate students who are admitted to the joint J.D./M.S. pathway. Admission requirements to that pathway are outlined above. Students entering the J.D./M.S. pathway will be placed on the non-thesis track.

2. Students on the non-thesis option may change to the thesis option with approval from the Director of the Legal Psychology Program and the Chair of the Psychology Department.

3. Except for the thesis requirement, the requirements for the M.S. degree, as specified by the Legal Psychology Program and the Psychology Department, apply to all students in the non-thesis option. As currently outlined, students must complete 9 hours of statistics classes, 12 hours of core Legal Psychology classes, and 9 hours of electives. Non-thesis option students must complete these requirements, plus 6 hours of additional electives.

4. As outlined in the joint degree pathway proposal, 9 hours of credit toward the M.S. degree may be allowed for upper level law school electives from a list of courses approved by the Chair of the Department of Psychology. These law school classes will be in lieu of 9 hours of credit as approved for each student.
Course Definitions and Descriptions

**Course Definitions**

- CBH-Comparative Psychology and Animal Behavior
- CLP-Clinical Psychology
- CYP-Community Psychology
- DEP-Developmental Psychology
- EAB-Experimental Analysis of Behavior
- EDP-Educational Psychology
- EXP-Experimental Psychology
- INP-Industrial and Applied Psychology
- LIN-Linguistics
- PCO-Psychobiology
- PSY-Psychology
- SOP-Social Psychology

**Course Descriptions**

**CBH 5256 Animal Cognition (3).** Survey of comparative cognition between humans and other animals. Major topics include perception, attention, learning, memory, reasoning, tool use, and language. Prerequisites: Graduate standing or permission of the instructor.

**CLP 5007 Psychological Clinical Science I: Historical Perspectives and Current Controversies (3).** This course overviews clinical child psychology, including (a) history and philosophy of psychological clinical science and (b) challenges and controversies related to bridging science and service. Prerequisite: Graduate standing.

**CLP 5165 Psychopathology (3).** This course will provide a comprehensive introduction to the literature on psychopathology with a focus on understanding its relationship to other areas of psychology. Prerequisite: Graduate standing.

**CLP 5166 Advanced Abnormal Psychology (3).** Advanced study of the causes, psychopathology manifestations, and social and personal consequences of behavior disturbance. Emphasis is placed on the critical examination of current research on the biological, psychological, and social aspects of these disorders. Clinical approaches to diagnosis, course, and prognosis in the contemporary mental health context (including 'practicum' assignments if feasible) are covered.

**CLP 5169 Proseminar in Developmental Psychopathology (3).** A comprehensive review of topics in developmental psychopathology including history, scope, methods, individual and contextual influences, developmental course, long-term outcomes, and resilience. Prerequisites: Graduate standing or permission of the instructor.

**CLP 5185 Current Issues in Mental Health (3).** A critical, intensive examination of selected, important issues in mental health. Emphasis is given to the empirical study of contemporary problems related to the making of mental patients; planning, programming, and administering mental health services; political, ethical, and legal constraints on the operation of mental health facilities; interdisciplinary cooperation among helping and human service professionals; and evaluation of preventive care and treatment services. Prerequisites: Abnormal Psychology or permission of the instructor.

**CLP 5483 Psychological Clinical Science II: Ecologies of Development and Theories of Psychopathology (3).** This course provides an overview of theories of clinical child psychology, including (a) ecologies of development as related to psychopathology and (b) theories of development psychopathology. Prerequisites: Graduate standing, CLP 5007.

**CLP 5531 Ethical Code in Psychological Practice (3).** Ethical principles, rules, procedures of Psychologists. Clinical application and incorporation of the principles into professional interactions. Ethical reasoning is emphasized.

**CLP 6060 Affective Bases of Behavior (3).** A comprehensive introduction to the literature on affective science with a focus on: behavioral, biological, cognitive, and social dimensions, as well as the relevance to clinical science. Prerequisite: Graduate Standing

**CLP 6168 Psychopathology Across the Life-Span (3).** Exploration of the causes of psychopathology from a life-span developmental orientation and implications for theories of personality. Prerequisites: CLP 5166 and permission of the instructor.

**CLP 6375 Clinical Psychology (3).** Introduction to the science-profession of clinical psychology, as it is applied to preventing, diagnosing and treating maladaptive or deviant human behavior and relationships. Prerequisites: Admission to the Graduate Program in Psychology or Education and permission of the instructor.

**CLP 6395 Forensic Psychology (3).** This course surveys the practical and ethical issues surrounding the interface between clinical psychology and the law. Prerequisites: CLP 4144, CLP 6168, or equivalent of either.
CLP 6426 Neuropsychology (3). Introduces students to basic foundations and some advanced concepts in Neuropsychology, with a focus on clinical applications. Topics covered will include functional neuroanatomy, brain disorders across the lifespan, and assessment of neuropsychological functions. Prerequisite: Permission of the instructor.

CLP 6432 Foundation Practicum I (3). This course provides a comprehensive introduction to the principles of psychological assessment and measurement in children and hands on practice in the administration of selected cognitive tests. Prerequisite: Graduate standing.

CLP 6436 Introduction to Psychological Assessment (3). This course provides instruction in the principles and methods underlying the administration, construction and evaluation of psychological tests and measures. Prerequisite: Graduate standing.

CLP 6437 Behavioral Assessment in Childhood (3). Standardized tests and inventories for the behavior assessment of infants, children, and adolescents will be surveyed. Prerequisites: Proseminar courses and second year graduate standing.

CLP 6438 Clinical Psychological Assessment (3). Supervision and didactic material will facilitate continued growth in psychological assessment for Ph.D. students. The focus is on selection, administration, and interpretation of psychological tests. Prerequisites: CLP 6432, CLP 6947, permission of the instructor.

CLP 6449 Career Development in Adolescence and Adulthood (3). An overview of career development and other life factors relevant to life stages from adolescence and beyond. Issues related to theory, research and application will be reviewed. Prerequisite: Graduate standing.

CLP 6471 Assessment and Treatment I: Internalizing Problems (3). Provides an in-depth examination of the evidenced-based assessments used in the psychological evaluation and treatment for children and adolescents with internalizing problems. Prerequisite: CLP 5007.

CLP 6472 Assessment and Treatment II: Externalizing Problems (3). Provides an in-depth examination of the evidenced-based assessments used in the psychological evaluation and treatment for children and adolescents with externalizing problems. Prerequisite: CLP 5007.

CLP 6473 Assessment and Treatment III: Developmental, Learning and Pediatric Disorders (3). Provides an overview of theory, research, and evidenced-based practices relevant for evidence based assessment and intervention for use with developmental, learning and pediatric disorders. Prerequisite: CLP 5007.

CLP 6498 Diagnosis and Treatment of Sexual Disorders (3). Clinical examination of sexual functioning, emphasizing disorders of gender identity, paraphilias and other dysfunctions and intimacy problems. Prerequisites: Graduate standing or permission of the instructor. Corequisites: SOP 3772 or equivalent.

CLP 6530 Dissemination and Implementation of Research (3). Addresses the increasing need to bridge research and practice to inform a new generation of effective services that are accessible to the large numbers of children and families in need.

CLP 6625 Clinical Supervision in Mental Health Counseling (1-20). Supervised experience in clinical supervision techniques and methods. Prerequisite: Master’s degree.

CLP 6943 Advanced Clinical Practicum (1-20). Allows students to practice clinical skills through participation in interactive classroom exercises while gaining clinical experience. Prerequisite: Clinical Practicum (CLP 6945).

CLP 6945 Clinical Practicum in Psychology (1-3). Supervised experience in clinical techniques and methods. Prerequisites: Graduate standing and permission of the instructor.

CLP 6947 Foundations Practicum II (Treatment) (3). This course provides a comprehensive introduction to the principles of psychological treatments for children and adolescents, with applied practice and supervision in psychotherapy techniques. Prerequisites: PSY 5939 (Foundation Practicum I: Assessment).

CLP 6948 Clinical Internship (0-3). Clinical Internship in Psychology for Ph.D. candidates who have completed the Clinical Practicum and at least 45 graduate credit hours. Prerequisites: Graduate standing and permission of the instructor, CLP 6945.

CLP 6949 Advanced Clinical Internship (1-20). Advanced clinical internship is the second semester of internship. Students receive supervision in advanced clinical techniques and personal and professional development. Prerequisites: Graduate standing and permission of instructor.

CYP 5534 Groups as Agents of Change (3). Theory and practice in utilizing groups as agents of change or development in communities and organizations. Didactic presentation and structured exercises focus on relevant issues. Students design and implement problem-focused interventions, using class as client system.

CYP 6526 Psychology Research Methods and Program Evaluation (3). A survey of principles of psychological research methods design in clinical research (e.g., randomized control trials/single case design) and program evaluation of human services programs.

CYP 6536 Principles and Methods of Psychological Consultation (3). An analysis of the basic psychological approaches underlying consultation, with special emphasis on the practical application of the processes of learning, cognition, and interpersonal relations to techniques of consulting with various ‘target’ agencies, individual clients, and other professionals in community settings. Prerequisites: Graduate standing at FIU or permission of the instructor.

CYP 6766 The Psychology of Crosscultural Sensitization in a Multicultural Context (3). A series of weekly seminars to increase student sensitivity to working with clients from different cultural backgrounds. The objectives of the course are: (1) facilitating student awareness of cultural differences and their impact on social and human services delivery systems, (2) identifying the student’s own personal cultural biases and values when interacting with culturally different persons, and (3) teaching students to develop culturally appropriate intervention skills.
CYP 6936 Current Issues in Community Psychology (3). An intensive analysis of contemporary theoretical, practical, and professional aspects of the field of Community Psychology. Topics discussed may lead to the graduate project required of each student. Prerequisites: Admission to graduate study in psychology (other graduate students admitted by permission of the instructor).

DEP 5056 Issues in Life-Span Developmental Psychology: Infancy through Old Age (3). A in-depth survey of theories, issues, methods, and data in life-span developmental psychology through the entire age range. Prerequisites: DEP 3001 or DEP 4464, or their equivalents, are recommended.

DEP 5058 Biological Basis of Behavior Development (3). Introduction to theory and research underlying behavioral development. Covers such pre-and post-natal determinants as evolution, genetics, neuroendocrines, as well as social development, behavioral ecology, and sociobiology. Prerequisites: Graduate standing or permission of the instructor. Corequisite: Proseminars.

DEP 5065 Cognitive Development (3). An overview of cognitive development, with a focus on the theories, experimental evidence, and milestones in cognitive development. Topics include the development of attention, perception, memory, problem solving, categorization, concepts, language, reasoning, theory of mind, metacognition, and executive function. Prerequisites: Graduate standing or permission of the instructor.

DEP 5068 Applied Life Span Developmental Psychology (3). This course is designed to acquaint the student with various applications in life-span developmental psychology. An overview of general issues and areas of application is offered, and specific applications are considered. Prerequisites: Graduate standing or permission of the instructor.

DEP 5099 Proseminar in Infancy, Childhood, and Adolescence (3). Provides a comprehensive review of issues in perceptual, cognitive, social, emotional, and personality development from infancy through adolescence. Prerequisites: Graduate standing or permission of the instructor. Corequisite: Proseminars.

DEP 5118 Current Issues in Cognitive and Perceptual Development in Infancy (3). Provides an in-depth analysis of current issues, methods, research and theory of cognitive and perceptual development during the first year of life. Special emphasis on object and event perception, memory, and imitation. Prerequisites: Two courses in developmental psychology -any level recommended.

DEP 5185 Emotional Learning and its Reversal (3). Theoretical analyses and methodological issues in the study of emotional learning. Prerequisites: Graduate standing or permission of the instructor.

DEP 5325 Proseminar in Identity Development (3). This class uses foundational identity theories and concepts to understand cross cultural development and psychological outcomes at an advanced level. Prerequisite: Graduate standing.

DEP 5344 Psychology of Moral Development (3). An introduction to the literature on moral development. Review and discussion of recent developments in this area. Prerequisites: Graduate standing or permission of the instructor.

DEP 5405 Proseminar in Psychology of Adulthood and Aging (3). A comprehensive review of topics in adulthood and aging including: biological changes, social processes, work, family, cognition, memory, personality, and psychopathology. Prerequisites: Graduate standing or permission of the instructor.

DEP 5608 Theoretical Perspectives in Developmental Psychology (3). The focus of this course is on the major paradigms, models, and theories that have been influential in developmental psychology, both historically and contemporaneously. Meta-theoretical issues, paradigmatic influences, and specific theories are considered. Prerequisites: Graduate standing or permission of the instructor.

DEP 5725 Seminar in Psychosocial Development (1). This course is designed to develop research skills and competencies in the area of psychosocial development. The emphasis of the course is on involvement in original research. Prerequisite: Permission of the instructor. Corequisites: Senior undergraduate or graduate standing.

DEP 5796 Methods of Developmental Research (3). Survey of issues and methods at all stages of life-span developmental research including theory, methods, design, and data reduction. Prerequisites: Graduate standing or permission of the instructor. Corequisites: Independent research in a developmental lab (PSY 5918 or PSY 6971).

DEP 6046 Cross Cultural Perspectives of Emerging & Established Adulthood (3). An advanced psychology course that uses intersectional approaches to examine social, biological, and cognitive processes during emerging and established adulthood. Prerequisite: Graduate Standing

DEP 6117 Psychology of Caregiving (3). An advanced seminar focusing on one or more topics in depth and requiring literature reviews and research design. Topics may include timing of parenthood, adoption, and fatherhood.

DEP 6145 Psychology of Culture and Childhood (3). Extensive cross-cultural readings will serve as the focus for seminar discussion of cultural influences on children's biological, motor, perceptual, cognitive, social, and personality development. Prerequisites: Graduate standing or permission of the instructor.

DEP 6186 Social Development and Learning (3). Theories and facts of socio-emotional development, learning, and the acquisition and maintenance of social relationships in early life are examined critically. Prerequisites: DEP 2000 or DEP 2001 or equivalent.
DEP 6465 Psychology of Culture and Aging (3). An intensive examination of cultural influences on social and psychological aging processes including minority aging and involving seminar discussion and independent projects. Prerequisite: Graduate standing.

DEP 6466 Cognitive Processes in Aging (3). An intensive analysis of the background and recent developments in the area of age changes and age differences in intellectual functioning and learning memory processes. Prerequisite: DEP 5405.

DEP 6477 Psychology of Social Processes in Aging (3). An intensive analysis of the background and recent developments in theoretical models of social development, personality processes, and social processes in the older adult. Prerequisite: DEP 5405.

DEP 6645 Cognition and Language (3). Course covers the acquisition of cognitive processes and language, and their interdependence. Theory and research focusing on innate vs. learned aspects are discussed. Prerequisites: Graduate standing or permission of the instructor.

DEP 6936 Current Literature in the Psychology of Infancy, Childhood, and Adolescence (3). This seminar will present and evaluate current research articles in the major journals in infant, child, and adolescence psychology. Prerequisite: Second year graduate standing.

DEP 6937 Current Literature in the Psychology of Adulthood and Aging (3). This seminar will present and evaluate current research articles in the major journals in the psychology of adulthood and aging. Prerequisite: Second year graduate standing.

DEP 6945 Life-Span Developmental Psychology Practicum (3). This is an individually tailored program where students will work in an agency on a specific problem or project, culminating in a final written report. Prerequisite: Second year graduate standing.

DEP 7069 Seminar in Life-Span Cognitive Developmental (3). This graduate seminar will examine, through intensive reading and seminar discussion, the major theories, issues and empirical research on cognitive growth, change and decline from infancy through old age. Prerequisites: Two courses in Developmental Psychology (any level).

DEP 7096 Seminar in Psychology of Life-Span Social Development (3). This course includes a consideration of general issues and discussion of the application of life-span models to selected topics development. Prerequisites: Graduate standing or permission of the instructor.

EAB 5098 Proseminar in the Experimental Analysis of Behavior (3). An advanced survey of the principles of respondent and operant conditioning and the bases of action in both social and non-social settings. Prerequisites: EAB 3002 or equivalents.

EAB 5655 Advanced Methods of Behavior Change (3). An intensive study of selected methods of modifying human behavior, emphasizing the applications of the principles of respondent and operant conditioning, as well as those derived from modern social learning theories. Practice and role playing opportunities are provided in behavior therapy, relaxation therapy, behavior modification, biofeedback or similar behavioral approaches. Prerequisites: EAB 3794, CLP 4374, CYP 4144; enrollment in an authorized program; equivalent background; or permission of the instructor.

EAB 5700 introduction to the Concepts and Principles of Applied Behavior Analysis (3). An intensive study of learning principles and methods of behavior change and complex learning processes, including Skinner's analysis of verbal behavior. Prerequisite: Graduate Standing.

EAB 5701 Behavior Assessments (3). Behavior analytic assessment including descriptive assessment and functional analysis, identification of behavior function, assessment of skill deficits, and identifying treatment goals. Prerequisite: Graduate standing.

EAB 5797 Single-Case Research Methods (3). Intensive study of designs, strategies, and methods of single-case behavioral research. Prerequisites: Graduate standing or permission of the instructor.

EAB 5917 Supervised Research in Behavior Analysis (0-3). Students complete an applied research capstone project in their practicum placement. The project is proposed, conducted and defended across 3 semesters. Course can be repeated. Prerequisites: Graduate standing and instructor permission.

EAB 5937 Special Topics in Behavior Analysis (0-3). The purpose of this course is to expand the student's breadth and depth of knowledge in a variety of behavior analysis topics. Course can be repeated. Prerequisites: Graduate standing and permission of the instructor.

EAB 6005 Advanced Concepts and Principles of Applied Behavior Analysis (3). A critical examination of the theory, concepts, and principles of applied behavior analysis. The course will cover historical figures and events that led to the development of the field. Prerequisite: Graduate standing.

EAB 6707 Learning and Development (3). A survey of the application of the principles, methods, and applications of experimental behavior analysis to various life-span segments and developmental themes. Prerequisites: Proseminar in Behavioral Analysis or an undergraduate EAB course (EAB 3002 or EAB 3794).

EAB 6717 Science and Practice of Verbal Behavior (3). Behavior is analyzed by function. Structural and developmental issues as well as implications for language training and ethical application integrated throughout. Prerequisite: Graduate standing.

EAB 6770 Behavioral Technologies (3). Evaluating interventions, staff training, managing treatment teams, as well as, data-based evaluation of teaching procedures, behavior outcomes and team member performance. May be taken twice for credit. Prerequisite: Graduate standing.

EAB 6780 Ethical Code in Behavior Analysis (3). Ethical issues in clinical Behavior Analysis are examined including selecting behavior targets, monitoring intervention success and transferring control to existing environmental contingencies. Prerequisite: Graduate standing.

EAB 6941 Practicum in Applied Behavior Analysis (1-3). Supervised experience in behavior analysis that meets BCBA certifications standards. Includes completion of a capstone project. May be repeated.
EDP 6935 Special Topics in Educational Psychology (VAR). An intensive analysis of a particular topic in educational psychology. Students must have topics approved by the instructor prior to registration. Open only to advanced and graduate students in the College of Education.

EXP 5099 Proseminar in Experimental Psychology (3). Provides a comprehensive review of current research and theory in areas such as learning, memory, cognition, sensation, and perception. Prerequisites: Graduate standing or permission of the instructor.

EXP 5406 Theories of Learning (3). The major theoretical systems of learning are covered, with the intent of determining how well each accounts for the phenomena of learning. Emphasis is placed on exploring the controversial issues raised by extant theories, and the experimental resolution of these theoretical controversies. The impact of theory on current thinking about learning is considered.

EXP 5508 Applied Cognitive Psychology (3). Covers the basic theories of cognitive psychology perception, attention, memory, learning, knowledge, with emphasis on application to real-world problems. Prerequisite: Graduate standing.

EXP 5527 Memory and Consciousness (3). The relation of memory and consciousness is explored with emphasis on issues of current research and theoretical work from both a cognitive and a neuropsychological perspective. Prerequisite: Graduate standing.

EXP 5667 Cognitive Neuroscience (3). Investigation of the relation between mind and brain. Discuss literature from both patient studies and from the growing research in neuroimaging. Prerequisite: Graduate standing.

EXP 7747 Practicum in Causal Modeling (3). Introduction to linear structural relations models, emphasizing logical and practical problems in inferring causation for experimental and correlational research designs.

INP 5095 Proseminar in Industrial Psychology (3). Provides coverage of industrial and personnel psychology topics such as job analysis, personnel recruitment and selection, legal aspects of employment, performance appraisal, and training design and evaluation. Prerequisites: Acceptance to Master’s or Ph.D. program in Psychology.

INP 5136 Psychology of Legal Consultation (3). Practice in basic non-clinical areas in which psychologists assist attorneys, including jury selection, surveys, and simulations. Prerequisites: SOP 6098 or equivalent.

INP 6090 Applied Psychology and Organizational Consulting (3). An overview of the organizational consulting process, including proposal development, managing projects and client relationships, ensuring information integrity, and understanding ethical issues. Prerequisite: Graduate standing.

INP 6115 Psychology of Culture and Organizations (3). An overview of theory and research examining the psycho-social environment of organizations, including the factors that shape organizational cultures and climate, along with the implications for workplace motivation, morale, and productivity. Prerequisite: Graduate standing.

INP 6216 Personnel Selection (3). Characteristics of Personnel Selection systems used in organizations. Validity generalization, utility, applicant reactions, and legal cases pertaining to employee selection. Prerequisites: Proseminar in I/O and graduate level statistics course.

INP 6235 Applied Psychology of Training and Development (3). In-depth study of principles of behavior and attitude change in organizations. Topics include organization analysis, program design and implementation, and evaluation of results. Prerequisites: Acceptance to M.S. or Ph.D. program in Psychology and SOP 5616.

INP 6611 Organizational Stress (3). This seminar examines conceptualizations, causes, consequences, and correlates of stress, strain, and coping in the workplace.

INP 6940 Strategies and Methods of Applied Psychological Research (3). A practicum course in the psychological research strategies and the application of computers in the analyses of psychological data.

LIN 5701 Psychology of Language (3). An overview of the psychology of language and the psychological ‘reality’ of linguistic structure. Behavioristic vs. cognitive views of psycho-linguistics are examined. Consideration is given to the biological bases of language and thought, language acquisition, and language pathology.

PCO 5251 Couples and Family Systems (3). An overview of theory, research, and treatment issues related to couples and family systems. The course covers relevant techniques, training, and professional issues. Prerequisite: Graduate standing.

PCO 5252 Theory and Techniques in Couples and Marital Therapy (3). An overview of the theories and techniques used in couples and marital therapy with an examination of treatment approaches and evidence-based practice. Consideration of clinical issues and problems.

PCO 5253 Theory and Techniques in Family Therapy (3). An examination of the major theories and techniques used in family therapy with an in-depth exploration of the skills and strategies used for treating clinical issues from multiples perspectives.

PCO 5311 Theory, Treatment, and Research of Addictive Behavior (3). An overview of theory, treatment, and research findings pertaining to the process and development of addictive behavior. This course covers treatment issues related to substance abuse disorders. Prerequisite: Graduate standing.

PCO 5750 Contemporary Issues in Family Life and Process (3). An examination of selected issues that are faced during the development and life cycle of the family. Family intergenerational history and sociocultural factors will be explored.

PCO 6206 Principles & Practices of Counseling & Psychotherapy (3). Examination of the principles &
practices of counseling and psychotherapy derived chiefly from cognitive behavioral psychology. Prerequisite: Graduate standing.

PSO 6254 Principles and Practices in Couples and Family Therapy (3). An examination of the principles and practices used in couples and family therapy. Counseling skills and practical issues related to couples and family therapy will be examined.

PCO 6945 Case Conceptualization for Counselors (3). This course provides instruction on completing the capstone course in the Professional Counseling Psychology program. Students will develop a formal presentation of a clinical case they have treated. Prerequisite: CYP 6526

PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials (3). This course introduces students to the concepts, theory, and methods of human psychophysiology with a specific focus on electroencephalography (EEG) and event-related potentials (ERPs). Prerequisite: Permission of the instructor.

PSB 5247 Neurobiology of Learning and Memory (3). Seminar focusing on the themes and questions of how the brain supports learning and memory.

PSB 5615 Visual & Visuospatial Cognitive Neuroscience (3). Survey of contemporary visual cognitive neuroscience research; covers visual representation, how cognitive processes operate on such representation via interaction of visual and non-visual brain areas.

PSB 6035 Introduction to Computational Cognitive Neuroscience (3). Survey of models and methods from the computational neuroscience literature that are helpful to answer questions about the mechanisms of cognition and behavior. Prerequisite: Permission of instructor.

PSB 6215 Human Neuroanatomy (3). Survey of human spinal, brainstem, subcortical, and cortical neuroanatomy with reference to physiology and disease. Prerequisite: Permission of the instructor.

PSB 6247 Biological Bases of Behavior (3). Advanced survey of biological bases of behavior. Topics include neuroanatomy, functional organization and electro-chemical processes of the nervous system, and neural bases of learning and memory. Prerequisites: Graduate standing or permission of the instructor.

PSB 6350 Cognitive Neuroimaging Methods I (3). Data acquisition methods and their psychological application in cognitive neuroimaging, including techniques from nuclear medicine, electrophysiology, and magnetic resonance imaging.

PSB 6351 Cognitive Neuroimaging Methods II (3). Data analysis methods and psychological applications in cognitive neuroimaging, including image pre-processing, statistical modeling, brain connectivity techniques, and the visualization, interpretation, and reporting of results. Prerequisite: PSB 6350.

PSY 5246C Multivariate Analysis in Applied Psychological Research (3). Covers basic techniques of multivariate analysis, emphasizing the rationale and applications to psychological research. Includes multiple regression, Hotellings T, MANOVA, principal component analysis, and factor analysis. Prerequisites: STA 3123 or equivalent; linear algebra recommended.

PSY 5605 Proseminar: History and Systems of Psychology (3). An examination of the historical foundations of modern psychology and survey of current systems and schools of psychology. Prerequisites: Graduate standing or permission of the instructor.

PSY 5908 Directed Individual Study (VAR). Under the supervision of an instructor in the graduate degree program, the graduate student delves individually into a topic of mutual interest which requires intensive and profound analysis and which is not available in a formal offering. May be repeated once. Prerequisite: Permission of the instructor.

PSY 5918 Supervised Research (VAR). Research apprenticeship under the direction of a research professor or a thesis advisor. Prerequisite: Full graduate admission.

PSY 5930 Qualitative Research Methods in Psychology (3). Critical issues, theoretical and practical applications for conducting qualitative research in psychology. The focus will be on key research strategies and principles for research design.

PSY 5933 Current Topics in Neuroscience Series (0-1). This course provides students with the opportunity to present current topics in Neuroscience either from recently published literature or their own research. Course may be repeated for up to six credits.

PSY 5939 Special Topics in Psychology (3). Special topics will be announced in advance.

PSY 6061 Advanced Qualitative Methods Psychology (3). An advanced qualitative research analysis course that focuses on applying theory, and interpretation to hands data analysis practices and presentation. Prerequisite: PSY 5930

PSY 6076 Professional & Personal Development for Doctoral Students (3). A course providing early doctoral students with strategies for successful negotiation of graduate school training expectations, academic cultural norms, and career planning goals. Prerequisite: Graduate standing

PSY 6219 Research Methods in Clinical Child Psychology (3). An in-depth examination of research methods used in clinical child psychology, with an emphasis on intervention research. Prerequisites: CLP 5007; CLP 5483.

PSY 6919 Current Research Topics in Psychology (3). An overview of current theory and research in psychology with a focus on the research process. Case studies illustrate the development of research programs designed to advance theory in psychology. Prerequisite: Graduate standing.
PSY 6945 Teaching of Psychology (1). An introduction to the art of college teaching and specifically the art of teaching psychology. It is designed for first-year graduate students to provide instruction and support for teaching college classes. Prerequisite: Graduate standing.

PSY 6956 Psychology Field Experience (VAR). Placement of students in applied settings for the purpose of developing community-based experience in the application of theoretical and methodological approaches. Prerequisite: Graduate standing.

PSY 6971 Master’s Thesis in Psychology (3-6). Supervised research on an original research project submitted in partial fulfillment of Master’s degree requirement.

PSY 7940 Supervised Teaching in Psychology (1). Supervised teaching under the guidance of faculty advisor. May be repeated only three times. Prerequisite: Doctoral graduate study.

PSY 7980 Ph.D. Dissertation (1-12). Supervised research on an original research project submitted in partial fulfillment of doctoral degree requirements. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

SOP 5058 Proseminar in Social Psychology (3). An in-depth examination of the role of social psychology in the social sciences and the major substantive problems as they relate to contemporary societal issues. Minimum Prerequisites: An introductory course in social psychology or its equivalent.

SOP 5081 Psychological Influences on Health and Illness (3). Provides a comprehensive review of theory, research, and interventions in the field of health psychology. Prerequisites: Graduate standing or permission of the instructor.

SOP 5316 Theories and Methods of Cross-Cultural Research (3). An intensive analysis of contemporary theories and methods of cross-cultural research in psychology including topics such as: culture as a research treatment, differential incidence of personality traits, the use of ethnographies, ‘etic’ vs. ‘emic’ distinction. Prerequisites: Graduate standing or permission of the instructor.

SOP 5616 Social Psychology of Organizations (3). The application of concepts and theories from social psychology and sociology to the organizational setting. Emphasis will be on role theory, value formation and the operation of norms, including their development and enforcement. Formal and informal organization structure, power and authority concepts, and leadership theories will be covered. Communication processes and networks and their effects on task accomplishment and satisfaction will be included.

SOP 5726 Proseminar on the Psychology of Stereotyping, Prejudice, and Discrimination (3). This class uses social psychology theory and concepts to understand stereotyping, prejudice, discrimination, and minority experience at an advanced level. Prerequisite: Graduate standing.

SOP 5754 The Psychology of Eyewitness Identification (3). A review of the empirical research on the psychology of eyewitness identification and its application to real-world identification practices in criminal cases.

SOP 5755 Development and the Law (3). A review of psychological research on the intersection of developmental psychology and the legal system. Relevant case law will also be covered.

SOP 5756 Investigative Interviewing (3). A review of psychological research on investigative interviewing of vulnerable and non-vulnerable witnesses and victims.

SOP 5757 Interrogation and Deception Detection (3). A review of psychological research on interrogation, confession, and deception detection. Relevant case law will also be covered.

SOP 6098 Proseminar in Legal Psychology (3). The application of psychological research methods and psychological knowledge to contemporary issues in criminal and civil litigations. Prerequisite: Graduate standing.

SOP 6441 Seminar in Social Cognition (3). Provides a critical review of current theory and research on social cognition and its relationship to stereotyping, persuasion, attribution, and social perception. Prerequisite: Graduate standing.

SOP 6752 Psychology of Juries (3). A review of psychological research on juries and jury decision-making. Emphasis is placed on the critical analysis of jury research and relevant case law. Prerequisite: Graduate standing.

SOP 5753 Wrongful Convictions (3). A review of psychological research on factors contributing to wrongful convictions. Relevant case law will also be covered.
